

1. Make x the subject of each equation:

$$x + 1 = a$$

$$3x = b$$

$$2x + 3 = c$$

$$5x + 6 = d$$

$$\frac{x}{7} = f$$

$$\frac{x}{101} = w$$

2. Make x the subject of each equation:

$$2x + 1 = 2a$$

$$3x + 4 = 5b$$

$$2xy = c$$

$$5xz = d$$

$$c = \frac{t}{x}$$

$$y = \frac{p}{x}$$
