

1. A Quadrilateral is a shape with four sides

2 A rhombus is a quadrilateral with all sides the same length. Which shapes are rhombuses?

3. A rectangle is a quadrilateral with four right angles. Which of the shapes are rectangles?

4. A parallelogram is a quadrilateral with two pairs of parallel sides. Which of the shapes are parallelograms?

5. A square is a quadrilateral with four right angles and all sides the same length. Which of the shapes are squares?

6. A kite is a quadrilateral with at least one diagonal line of symmetry. Which of the shapes are kites?

7. A trapezium is a quadrilateral with at least one pair of parallel sides. Which of the shapes are trapeziums?

8. A rhombus is a quadrilateral with all sides the same length. Which shapes are rhombuses?

9. A rectangle is a quadrilateral with four right angles. Which of the shapes are rectangles?

10. A parallelogram is a quadrilateral with two pairs of parallel sides. Which of the shapes are parallelograms?

11. A square is a quadrilateral with four right angles and all sides the same length. Which of the shapes are squares?

12. A kite is a quadrilateral with at least one diagonal line of symmetry. Which of the shapes are kites?

13. A trapezium is a quadrilateral with at least one pair of parallel sides. Which of the shapes are trapeziums?
